

# Statement of Commitment Military Families

We recognize the tremendous value that spouses, caregivers and members of the armed services bring to our organization and community.

We commend their service to country, commitment to their families and expertise in the workplace.

Their dedication to assuring the defense of our nation while providing vital skills to employers in the communities where they live is of critical importance to our military and civilian institutions.

Therefore, we recognize, honor and pledge that:

We will strive to promote and extend policies and programs to attract, retain and develop military talent in critical healthcare occupations.

We will work collaboratively to develop career opportunities for military families interested in healthcare professions as a long-term career choice.

We will reduce barriers and simplify access to career opportunities and support military families currently in healthcare and nursing professions who might not otherwise remain in healthcare fields throughout the family's military commitment.
